BALL SPINDLE MOUNTED FLAP WHEELS

With ball spindle mounted flap wheels Cibo offers the solution for the finishing of inside tube joints, hollow forms and the deburring of bores. What used to be a tough and time consuming task, now becomes child's play.

This range of abrasive wheels is mainly to be used for the finishing of deep drawn parts, milled workpieces and extrusions.

Applications:

- stainless steel
- aircraft parts

- ducts and U-profiles
- mold construction
